# PRARTHANA GOPINATH A

**DATAANALYST | BUSINESSINTELLIGENCE&ANALYTICS**

aprarthana24@gmail.com • +91 9562682519 • github.com/24prarthana • linkedin.com/in/prarthana-gopinath •

## PROFESSIONAL SUMMARY

Results-oriented Data Analyst with a rigorous foundation in Computer Science and hands-on experience processing multi-source data using Python, SQL, and Power BI. Proven track record in data wrangling, exploratory data analysis (EDA), statistical modeling, and interactive KPI dashboard design. Adept at transforming unstructured business data into actionable commercial insights and executive-ready reporting.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages & DBs:** | Python, SQL, MySQL, PostgreSQL |
| **Data Analysis & EDA:** | Data Cleaning, Statistical Transformation, Pandas, NumPy, Scikit-learn |
| **BI & Visualization:** | Power BI (DAX, Power Query), Tableau, Advanced Microsoft Excel (Pivot, VLOOKUP, VBA) |
| **Developer Tools:** | Git, GitHub, Jupyter Notebook, VS Code, Seaborn, Matplotlib |

## INTERNSHIP EXPERIENCE

**Core AI & Analytics Intern | NearLearn**

- Extracted, cleansed, and modeled cross-functional business datasets using Python and MySQL, reducing data preparation pipeline latency.
- Executed in-depth exploratory data analysis (EDA) to detect outliers, trends, and anomalies across enterprise customer transactional records.
- Engineered structured feature pipelines and implemented statistical and machine learning algorithms to generate predictive analytical metrics.
- Synthesized findings into interactive Power BI dashboards, enabling data-informed operational decision-making for stakeholders.

**AI & Machine Learning Intern | LeapEDInnovation** Nov 2025 – Feb 2026

- Developed automated Python scripts leveraging Pandas and NumPy to preprocess unstructured datasets and standardize reporting schemas.
- Collaborated on applied machine learning workflows, evaluating model accuracy and documenting end-to-end data pipelines for internal teams.

## FEATURED ANALYTICS PROJECTS

**Customer Churn Analysis & Risk Prediction** Python, SQL, Power BI

- Queried and joined relational customer datasets using SQL; identified key churn drivers through bivariate and multivariate analysis.
- Designed a Power BI executive cockpit tracking customer lifetime value (CLV), attrition rate, and retention opportunities.

**Consumer Shopping Behavior & Sales Performance Dashboard** Power BI, Excel, SQL

- Constructed an interactive reporting matrix analyzing purchase patterns, seasonal demand, and regional category revenue across 10k+ rows.
- Built custom DAX measures for dynamic MoM growth calculations, inventory turnaround rates, and customer segmentation metrics.

**Financial Fraud Detection System** Python, Pandas, Scikit-learn

- Trained supervised classification algorithms to identify fraudulent transactions from highly imbalanced dataset profiles.
- Improved model precision and recall by executing SMOTE resampling and targeted feature engineering on high-variance transaction attributes.

## EDUCATION

**Bachelor of Computer Applications**
**Full Stack with AI & Cloud Computing**
SrinivasInstitute of Technology&InfoScience
**CGPA: 9.68 / 10.0** (2023 – 2026)

## CERTIFICATIONS & TRAINING

- **Data Analytics Simulation:** Deloitte (Forage)
- **Python Programming:** Infosys Springboard
- **Java Developer Program:** Infosys Springboard
- **AIML Certification:** LeapED Innovation
