PRARTHANA GOPINATH A

Python Developer | Backend Developer

Bangalore | 9562682519 | aprarthana24@gmail.com | github.com/24prarthana | linkedin.com/in/prarthana-gopinath

Professional Summary

BCA graduate with hands-on experience in Python programming, Flask, SQL, and backend application development. Skilled in object-oriented programming, database integration, REST API concepts, CRUD operations, data structures, debugging, and application development. Experienced in developing Python-based projects involving database management, data processing, and web applications. Seeking opportunities to contribute to software development and backend engineering teams.

Technical Skills

Programming Languages: Python, SQL, Java, C
Backend Development: Flask, RESTful API Development, CRUD Operations, Backend Logic, Server-Side Programming, Database Integration
Python Concepts: OOP, Data Structures, Functions, Modules, Exception Handling, File Handling, List Comprehensions, Iterators
Databases: Microsoft SQL Server, MySQL, SQL Queries, Joins, Subqueries, Aggregate Functions, Database Design, Relational Database
Python Libraries: Pandas, NumPy, Matplotlib
Frontend Fundamentals: HTML5, CSS3
Development Tools: PyCharm, Visual Studio Code, Jupyter Notebook, SQL Server Management Studio (SSMS)
Version Control: Git, GitHub

INTERNSHIP

Python / Data Analytics Intern — JUNE 2026

Nearlearn

- Worked with Python and SQL for data processing and database-related tasks.
- Applied Python libraries including Pandas for data cleaning and manipulation.
- Performed data validation, preprocessing, and structured data analysis.
- Developed practical experience in programming, problem-solving, and working with real-world datasets.

AIML Intern — NOV 2025 - FEB 2026

LeapED Innovations

- Completed a project-based internship focused on Python programming and Machine Learning.
- Applied Python to practical programming tasks and project development.
- Gained exposure to machine learning concepts and data preprocessing techniques.
- Worked on practical assignments involving analytical thinking and problem-solving

PROJECTS

1. **CivicPulse Pro – Smart City Analytics**
   Python | Streamlit | Pandas | Machine Learning | Plotly
   - Developed an interactive analytics application for monitoring and analysing smart city incidents.
   - Implemented data filtering, KPI tracking, geographical visualisations, and area-wise analysis
   - Integrated Random Forest-based predictions for forecasting future incident trends.
2. **DriveEase – Car Rental Management System**
   Python | Flask | Microsoft SQL Server | HTML | CSS
   - Developing a web-based car rental management application using Flask.
   - Implementing backend functionality for customer management, vehicle listings, and booking operations.
   - Integrating Flask with Microsoft SQL Server for database operations.
   - Designing booking workflows with pickup and return dates, booking status, and administrative management.
3. **Customer Churn Analysis**
   Python | Pandas
   - Developed a customer churn analysis project to examine customer behaviour and identify churn patterns.
   - Applied data processing and analytical techniques to extract meaningful insights.

EDUCATION

Bachelor of Computer Applications — **2023 - 2026**
Srinivas University - Mangalore
CGPA - 9.68

Certifications

- Programming Using Java - Infosys Springboard
- Introduction to Python - Infosys Springboard
- AIML Internship - LeapED Innovations

Soft Skill

- Problem-Solving
- Analytical Thinking
- Team Collaboration
- Adaptability
